

Oven And Grill Cleaner

Formulated to quickly penetrate and liquefy baked on food, grease, and carbon deposits. It is designed with heavy-duty cleaning in mind. Oven and Grill Cleaner is a high-foaming cleaner that clings and dissolves the type of heavy buildup experienced with industrial and commercial oven and grills.

Features & Benefits

- Liquefies even the toughest baked on food and grease.
- Nonflammable, and phosphate free.
- Certified NSF Category A-8 for meat processing plants.

Directions

Wear rubber gloves and protective eye goggles. Apply product (undiluted) to the bottom of the oven, then sides and top evenly. Allow cleaner to stand 10 minutes in a warm oven, or 25 minutes in cold oven, before gently agitating soil with a synthetic pad or brush. Wipe surface with cloth or paper towel to remove major soil and then thoroughly rinse all surfaces with potable water. Heavy, stubborn baked-on food and carbon deposits may require additional application. Once oven is completely clean, thoroughly rinse and heat oven to over 220 deg.F (104.4 deg.C) for 10 minutes before cooking additional foods.

NOTICE: DO NOT APPLY TO HEATING ELEMENTS, ELECTRIC SWITCHES, OR CONNECTIONS.

Can be used on hot or cold ovens. Food deposits reduce heating efficiency and increase fire hazards. Dirty ovens can cause unpleasant odors. Dirty cooking equipment can also distort the food's flavor and aroma.

CLEANING GRILLS: (Equipment needed: scraper, scrub brush, grill block, cloth, rubber gloves, and eye protection). Turn off grill and while still warm scrape surface with scraper, scrub brush, or grill block to remove excess grease and food from grease trough, and wipe clean with cloth. With hot water thoroughly rinse grill plate and all surfaces, then replace clean parts. Follow manufacturer's directions for resizing grill with vegetable oil after cleaning.

Certifications, Registrations & Notes

NSF Registered A8
Certified Kosher

Safety

See material safety data sheet and product label for safety information, handling and proper use.
