

HILLYARD ICE MELTER

Powered by the two patented de-icing accelerators,
ACTIVAR® and **PROPEL®**

Hillyard Ice Melter works faster and lasts longer - Melting the Competition.

Fast Acting - Long Lasting
Hillyard Ice Melter Melts More

Superior Melting Speed

Hillyard Ice Melter gets you to a safe surface faster, with less cost and application issues than a bag of calcium chloride.

Melt values determined utilizing Strategic Highway Research Program testing methodology SHRP H-205.1

 **Safe on Concrete** - the ingredients that make up Hillyard Ice Melter do not chemically attack good quality concrete that has been designed for exposure to winter weather and ice melter usage. Magnesium chloride is not added!

 **No Dust** - Hillyard Ice Melter goes through an in-house screen system eliminating the fine, dusty salt particles found in most blended ice melters. This eliminates blow-back when spreading and improves performance.

 **Low Cost** - Hillyard Ice Melter is a high performance alternative to calcium chloride, offering the benefits without the cost and application issues.

 **Anti-Caking** - Hillyard Ice Melter has anti-caking agents that provide easy flow for ice melt spreaders.

Available in a sturdy and convenient
50 lb. bag.....Item #HIL29931
100 lb. drum.....Item #HIL29948
